

Maryland Inventory of Historic Properties

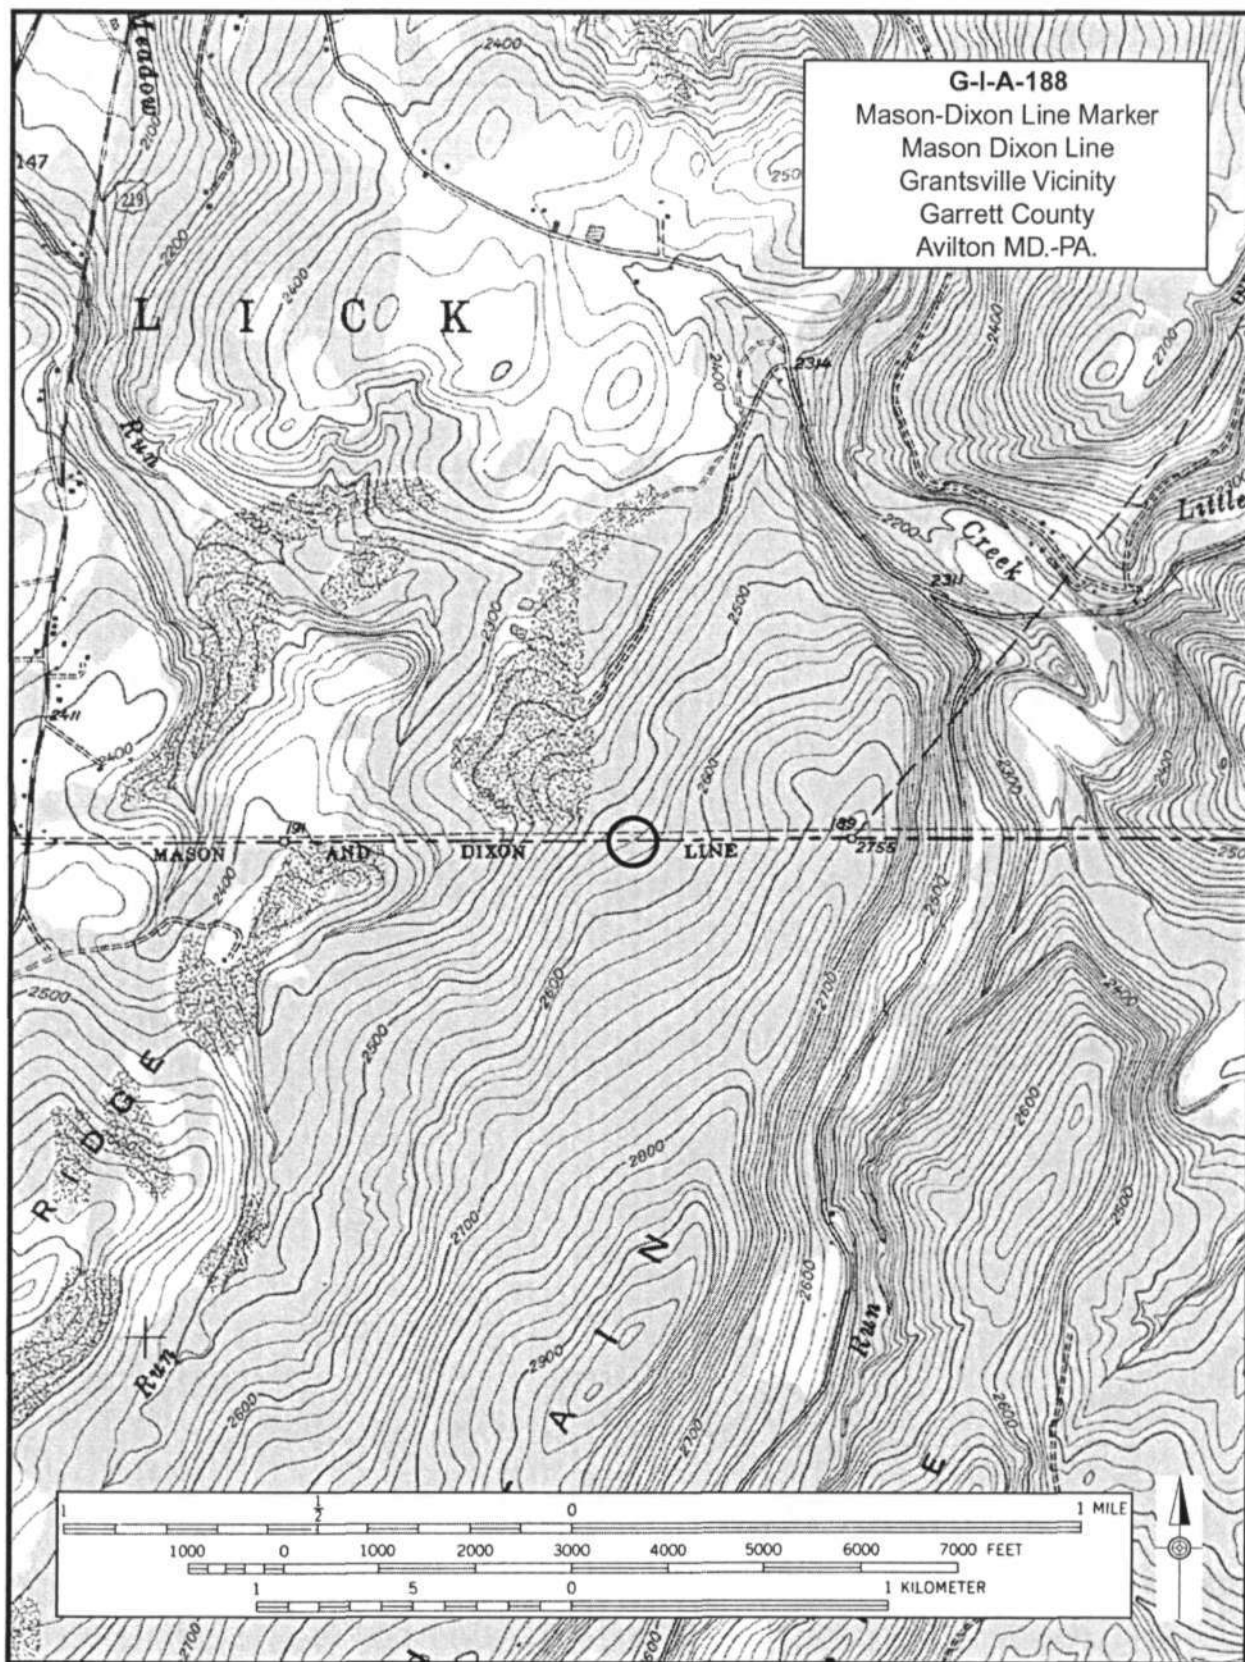

Addendum

MIHP Number: G-I-A-188

Property Name: Mason Dixon Line Milestone 190

Property Address: Maryland – Pennsylvania Border, on the western slope of Meadow Mountain 3,400 feet east of U.S. 219.

Mason-Dixon Line Milestone 190 is a small rectangular stone marker set atop an earthen and stone mound. The monument and mound, the ruin of the original cairn, represent one of the survey points established during the initial 1767 survey and confirmed during the 1902 resurvey. We located, mapped and photographed the monument, and found it intact. The Maryland Historic Trust and the Maryland Geological Survey surveyed the marker in 1981 and it was nominated for the National Register of Historic Places the following year as part of "Boundary Markers Along The Mason-Dixon Line Thematic Group." Information on file at the Pennsylvania Historical and Museum Commission indicates that the markers were listed in the National Register of Historic Places in 1975. As the historic property boundary has not been clearly defined, we recommend a fifty-foot diameter circle from the 1902 marker, including the marker, cairn, mound and immediate setting, as the historic property boundary.

ABSTRACT

G-IA-188

MASON-DIXON LINE: MILESTONE NO. ---(190)

1767 (mound), 1902 (monument)

Salisbury, Pennsylvania vicinity

Public/private

Milestone No. ---(190) and its mound of stones on the western slope of Meadow Mountain mark Mason and Dixon's 17⁴th mile west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line, the English provincial boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. The monument is a very plain dressed marble post with a low pyramidal top, quarried and carved in Cockeysville, Maryland; is in excellent condition, unaltered, firmly in place; measures 10 inches square by about 10 inches high above the mound; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, the year 1767 on the east side (when the site was originally surveyed and marked with a cairn), and 1902 (when the new monument was added to the center of the mound during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary, replacing the original wood post, no longer there). The/^{original}mound, also in excellent condition, measures about 10 feet in diameter by about 2 feet high at the center. On the national and state levels, No. ---(190) and its mound are significant primarily as being among the thematic group series of some 248 markers still visually defining the West Line. Locally, as among the some 42 markers along the present Garrett/Somerset-Fayette county boundary, they are also significant symbolically for their identifiable relationship to the colonial and Civil War heritage of these counties.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Milestone No. ---(190) and its ^{loose} mound of stones mark Mason and Dixon's 174th mile west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line. The monument was a new dressed Cockeysville marble post with a low pyramidal top when added to the mound in 1902 during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. It is in excellent condition, unaltered, firmly in place; measures 10 inches square by about 10 inches high above the mound; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, the year 1767 on the east side (when the site was originally surveyed and marked with a cairn), and 1902 on the west side. The mound, also in excellent condition, is the remains of the original cairn, measures about 10 feet in diameter by about 2 feet high at the center, where the monument replaced the original wood post ^{by then} long gone.

The area here is the ^{high, remote, stoney} densely forested western slope of Meadow Mountain. The site is within Election District 3 of Garrett County, MD, and Elk Lick Township of Somerset County, PA; about 2 miles south-southeast of the town of Salisbury; about 2½ miles north of the scattered settlement of Piney Grove, MD; at a point about halfway between Meadow Mountain ridge and Meadow Run; at a point about 3400 feet west of Meyersdale Road/T-496 and about 50 feet south of the pipeline under construction, in the woods, flanked by two young trees and obscured by woodland debris shoved almost to the site from work along the pipeline. It cannot be seen from any road or the pipeline, though rather easily from a woodland trail south ^{the site} of and paralleling the pipeline. The site is protected by this remoteness and obscurity, but perhaps not from ^{pipeline} logging operations.

The monument, as with all 1902 monuments set west of Sideling Hill, was quarried and carved in Cockeysville, MD, of a white, fine-grained marble called saccharoidal dolomite or magnesian limestone; was originally cut about 10 inches square by about 4½ feet long, intended for setting about 1½ feet above ground with the remaining 3 feet for setting into the ground, eliminating the need for a concrete foundation. The letters and numbers are blocky, V-sunk without serifs, and are horizontally aligned as a band around the stone near the top. These, and the top planes and apex are all clear and intact, though the stone surfaces are mottled with lichen. The mound is so camouflaged by woodland debris and no official identification, it could easily disappear unintentionally by the pipeline clearing and logging operations.

(see Thematic Group National Register nomination form for full descriptions of the various kinds of monuments set during the 1900-03 Resurvey, and the original Mason and Dixon cairns)
